

New Source Review newspaper advertisements for construction permit applications, August 5, 2004. The following public notices have been published in the newspapers listed below each advertisement. These newspaper advertisements for construction permit applications were published on one of the following dates: August 3, August 4, or August 5, 2004. Public notices are generally published every two weeks. The previous publication of public notices was July 20 – 22, 2004.

PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction of air contaminant sources as noted below. The proposed construction is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9th Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is Vulcan Construction Materials, L.P. with a mailing address of P.O. Box 7, Knoxville, TN 37901. They seek to obtain an air contaminant permit (Division identification number: 03-0006-02/57476) for construction of a Diesel-generator Unit located at 8595 Hwy. 192, Holladay, TN 38341. This proposed operation would consist of a small diesel-powered electric generating unit used to provide power for the pugmill associated with the quarry. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. R. Benjamin is the assigned Division person.

For the Benton County “Camden Chronicle”--published once on or before Thursday, August 5, 2004.

FIRST APPLICANT

The first applicant is Vulcan Construction Materials, L.P. with a mailing address of P.O. Box 7, Knoxville, TN 37901. They seek to obtain air contaminant permits for construction of air contaminant sources at 412 Endsley Quarry Road, Friendsville, TN 37737, as follows:

(1) Rock Crushing and Sizing Operation (Division identification number: 05-0125-01/57453). This proposed operation would consist of a feeder, crushers, screens, pugmills, conveyors, bins, one (1) 185 hp internal combustion engine, and one (1) 1015 hp internal combustion engine. Diesel would be used for fuel. Wet suppression would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. K. McLain is the assigned Division person.

(2) Portable Screening Unit (Division identification number: 05-0125-02/57454). This proposed operation would consist of a feeder, screen, and conveyors. Wet suppression would be used for pollution control. There would

be physical construction. Regulated air contaminants would be emitted by this source. Mr. K. McLain is the assigned Division person.

SECOND APPLICANT

The second applicant is Vulcan Construction Materials, L.P. with a mailing address of P.O. Box 7, Knoxville, TN 37901. They seek to obtain air contaminant permits for construction of air contaminant sources at 212 Caney Branch Road, Rockford, TN 37853, as follows:

(1) Rock Crushing Operation (Division identification number: 05-0195-01/57455). This proposed operation would consist of a jaw crusher, cone crusher, screens, conveyors, crushed rock, sand stockpiles, and associated equipment used to produce gravel. Wet suppression would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. J. Martin is the assigned Division person.

(2) Portable Screening Operation (Division identification number: 05-0195-02/57456). This proposed operation would consist of a grizzly feeder, a screen, conveyors, and associated equipment used to size crushed gravel. Wet suppression would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. J. Martin is the assigned Division person.

(3) Internal Combustion Diesel Generators (Division identification number: 05-0195-03/57457). This proposed operation would consist of three generators used to power a rock crushing operation. No. 2 fuel oil would be used as fuel. Because of the amount and type of emissions, the use of air pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. J. Martin is the assigned Division person.

For the Blount County "Maryville Daily Times"--published once on or before Thursday, August 5, 2004.

The applicant is Electric Research and Manufacturing Cooperative, Inc. with a mailing address of P.O. Box 1228, Dyersburg, TN 38025. They seek to obtain an air contaminant permit (Division identification number: 23-0057-06/57449) for construction of a Surface Coating Operation at 1625 Sylvan Road, Dyersburg, TN 38025. This proposed operation would consist of one (1) wet paint booth. Dry filters would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Ms. G. Latif is the assigned Division person.

For the Dyer County "State Gazette"--published once on or before Thursday, August 5, 2004.

The applicant is Rinker Materials, dba Loven, Inc. with a mailing address of P.O. Box 2389, Knoxville, TN 37901. They seek to obtain an air contaminant permit (Division identification number: 32-0228-01/57295) for a Concrete Batch Plant located at 1663 South Sugar Hollow Road, Morristown, TN 37901. This existing operation consists of a concrete batch plant, cement and fly ash silos, and associated equipment used to produce ready mix concrete. A baghouse and wet suppression are used to control particulate (TSP) emissions. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. D. Gosslee is the assigned Division person.

For the Hamblen County "Citizen Tribune"--published once on or before Thursday, August 5, 2004.

The applicant is Greenback Asphalt Co., Inc. with a mailing address of 2250 Big Hill Road, Lenoir City, TN 37771. They seek to obtain an air contaminant permit (Division identification number: 53-0112-01/57418) for an Asphalt Batch Plant located at 2250 Big Hill Road, Lenoir City, TN 37771. This existing operation consists of crushed rock and sand stockpiles, silos, batch mixer, conveyors, hot oil heater, diesel engine generator, and associated equipment used to produce hot-mix asphalt. No. 2 fuel oil is used for fuel. Baghouses are used for pollution control. The requested modification is to update the emissions. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. J. Martin is the assigned Division person.

For the Loudon County "News-Herald"--published once on or before Thursday, August 5, 2004.

The applicant is Radiation Protection Products, Inc. with a mailing address of P.O. Box 19, Chapel Hill, TN 37034. They seek to obtain an air contaminant permit (Division identification number: 59-0084-01/57423) for modification of a Lead Melting Operation located at 2420 Crutcher Road, Chapel Hill, TN 37034. This existing operation consists of two natural gas fired lead melting pots, assorted saws, and a roller mill used in the production of lead sheets. The requested modification is to increase the permitted allowable process input rate from 1166 pounds per hour to 6000 pounds per hour. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. M. Smith is the assigned Division person.

For the Marshall County "Lewisburg Tribune"--published once on or before Thursday, August 5, 2004.

The applicant is Eagle Plaza Alteration and Dry Cleaner with a mailing address of 235 D Tiny Town Road, Clarksville, TN 37042. They seek to obtain an air contaminant permit (Division identification number: 63-0178-01/57459) for construction of a Dry Cleaning Operation at 233 Tiny Town Road, Clarksville, TN 37042. This proposed operation would consist of a large dry-to-dry perchloroethylene dry cleaning machine. A refrigerated condenser would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Ms. Nicole King is the assigned Division person.

For the Montgomery County "Leaf-Chronicle"--published once on or before Thursday, August 5, 2004.

The applicant is Heraeus Metal Processing, Inc. with a mailing address of P.O. Box 280, Coalfield, TN 37719. They seek to obtain an air contaminant permit (Division identification number: 65-0049-01/57486) for modification of a Precious Metal Recovery Operation located on Route 62 E. Knoxville Highway, Wartburg, TN 37887. This existing operation consists of eight natural gas-fired roasting ovens used to recover precious metals. An afterburner, quench tank, and scrubbers are used for pollution control. The requested modification is for the addition of one furnace. There would be physical construction. Regulated air contaminants emitted by this source would increase. Mr. T. Blake is the assigned Division person.

For the "Morgan County News"--published once on or before Thursday, August 5, 2004.

FIRST APPLICANT

The first applicant is IMI Tennessee, Inc. with a mailing address of 2531 Park Drive – Suite D, Nashville, TN 37214. They seek to obtain an air contaminant permit (Division identification number: 75-0566-01/57458) to construct a Concrete Batch Plant on Highway 41 at Old Stone Man Quarry, Murfreesboro, TN 37130. This proposed operation would consist of a batch mixer, cement silos, and associated equipment used to produce

ready mix concrete. A baghouse would be used to control particulate (TSP) emissions. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. R. Simmons is the assigned Division person.

SECOND APPLICANT

The second applicant is Quality Industries, Inc. with a mailing address of P.O. Box 7016, LaVergne, TN 37086-7016. They seek to obtain an air contaminant permit (Division identification number: 75-0171-15/57477) to construct a Jamb Cell Operation at 130 Jones Boulevard, LaVergne, TN 37086. This proposed operation would consist of polishing, blending, deburring, surface grinding, and cleaning of aluminum parts. A baghouse would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. W. Medley is the assigned Division person.

For the Rutherford County "Daily News Journal"--published once on or before Thursday, August 5, 2004.

The applicant is Middle Tennessee Limestone, LLC with a mailing address of P.O. Box 189, Doyle, TN 38559. They seek to obtain an air contaminant permit (Division identification number: 93-0073-01/57466) to modify a Rock Crushing and Sizing Operation located at 5880 McMinnville Highway, Doyle, TN 38559. This existing operation consists of crushers, screens, conveyors, aggregate stockpiles, and associated equipment used to produce crushed limestone aggregate. Wet suppression is used for the control of particulate (TSP) emissions. The requested modifications are to change the primary crusher configuration and to increase the production capacity from 250 to 500 tons per hour. There would be physical construction. Regulated air contaminants emitted by this source would increase. Mr. W. Medley is the assigned Division person.

For the White County "Sparta Expositor"--published once on or before Thursday, August 5, 2004.
